ABOUT US

Forex trading, also known as foreign exchange or FX trading, is the conversion of one currency into another. FX is one of the most actively traded markets in the world, with individuals, companies and banks carrying out around \$6.6 trillion worth of forex transactions every single day. Forex, or foreign exchange, is the global market where currencies are bought and sold. It's essentially the largest financial market in the world, where banks, businesses, governments, and individuals exchange currencies. Forex trading involves speculating on the value of currencies to profit from fluctuations in exchange rates.

WHAT IS FOREX TRADING

Forex trading is the buying and selling of currencies, also known as foreign exchange (FX) trading. It's the world's largest financial market, with trillions of dollars traded every day.

What Is Being Traded?

- ✓ **EUR/USD** (Euro vs. US Dollar)
- ✓ **GBP/JPY** (British Pound vs. Japanese Yen)
- ✓ **USD/NGN** (US Dollar vs. Nigerian Naira, though less commonly traded)

You buy one currency while simultaneously selling another. If the value of the currency you bought goes up, you make a profit.

How Do People Trade Forex?

- **Manually** via trading platforms like Meta Trader 4/5 (MT4/MT5), Trading View, etc.
- **Using brokers** (online platforms that give you access to the market).
- **Automated trading** using bots or expert advisors.

How Do You Make Money?

- **Speculation:** Predicting whether a currency will go up or down.
- **Leverage:** Brokers often allow you to trade more money than you actually have (risky, but can boost profits).
- **Pips:** The smallest price change in the exchange rate. Your profits/losses are calculated in pips.

A FOREX TRADING CHART

Got it! A **Forex trading chart** is a visual representation of the price movement of a currency pair over time. Traders use these charts to analyze trends, find entry/exit points, and make decisions.

Here's a breakdown of the **main types of Forex charts** you'll come across:
